Summary

I'm Adam Rany Kamaleldin Mohamed Monir, an undergraduate in Artificial Intelligence Engineering student at Alamein International University, with a strong foundation in software development, AI, and network systems. Over the past three years, I've worked on diverse projects that combine theory and application including smart systems, game development, algorithm design, and healthcare platforms. My academic and practical experiences have shaped me into a problem solver passionate about AI innovation, software architecture, and building solutions that have real world impact.

Education

Alamein International University — Alexandria, Egypt Bachelor of Science in Computer Engineering • GPA: 3.00
2022 - 2027 (Expected)
Artificial Intelligence Engineering

Experience

Alamein International University (AIU) & Alexandria Quantum Computing Group (AleQCG) June - December 2025
trainee

Completed a 12-week quantum computing program with 50+ hours of lectures and hands-on lab work, finishing with an independent final project. [Certificat link](#)

National Telecommunication Institute (NTI) — ITIDA

Full Stack Web Development using PHP
Finished an ITIDA-certified 120-hour program in full-stack PHP web development plus freelancing skills. [Certificat link](#)

International Collegiate Programming Contest

ICPC Participant
Competed as a team member in the ICPC Alexandria regional round solving algorithmic problems under timed conditions.

Projects

Blood Sugar Detection

Built an ML diagnostic tool using Scikit-learn to predict blood sugar levels through data preprocessing, feature engineering, and classification algorithms.

Multi-Task BERT for Text Analysis

Enhanced a PyTorch BERT model to simultaneously handle sentiment analysis, paraphrase detection (82% accuracy), and semantic similarity using a custom task-weighted loss function.

Reinforcement Learning Game from Scratch

Designed a 2D Python game environment and implemented Dynamic Programming, Q-Learning/SARSA, and Policy Gradient algorithms from scratch to compare RL performance.

Coursera Management System

Architected a relational database with SQL for course enrollment and student tracking, applying ERD modeling and query optimization.

Smart City Optimization in Egypt

Built a graph-based routing system for Egyptian city infrastructure using Dijkstra's algorithm and Minimum Spanning Tree to optimize network connectivity.

Certifications

Algorithms on Graphs UC San Diego (Coursera) Certificat link	April 2025
Introduction to Agile Development and Scrum IBM (Coursera) Certificat link	May 2025
Natural Language Processing with Classification and Vector Spaces DeepLearning.AI Certificat link	December 2025
Machine Learning for All University of London (Goldsmiths) (Coursera) Certificat link	May 2024
Databases and SQL for Data Science with Python IBM (Coursera) Certificat link	May 2024

Skills

Web Development HTML, CSS, PHP, React, Tailwind CSS, Bootstrap	Data & Analytics SQL, R Studio	Programming Languages Python, JavaScript, TypeScript, Java
Soft Skills Team Collaboration, Adaptability, Technical Mentorship, Analytical Problem Solving, Communication	Cloud & DevOps AWS (Amazon Web Services)	
Languages		
English Upper Intermediate	Arabic Native
